

# SureLock Kiosk Lockdown

## Lock down Android devices into Kiosk Mode

SureLock transforms Datalogic rugged mobile computers into dedicated-purpose devices. Once devices are locked down, the end user can only access pre-approved applications, mobile features and settings. SureLock ensures mobile devices are used for intended business purposes only.

### Key Benefits for Enterprises

- Increase workforce productivity by providing access only to company-approved applications
- Reduce device maintenance and support costs by ensuring users are restricted to only approved applications and settings
- Prevent intentional or unintentional misuse of mobile devices and settings
- Password-protect sensitive data and applications
- Maintain native Android UI and user experience
- Configure over-the-air (OTA) device lockdown settings
- Easily brand and customize devices

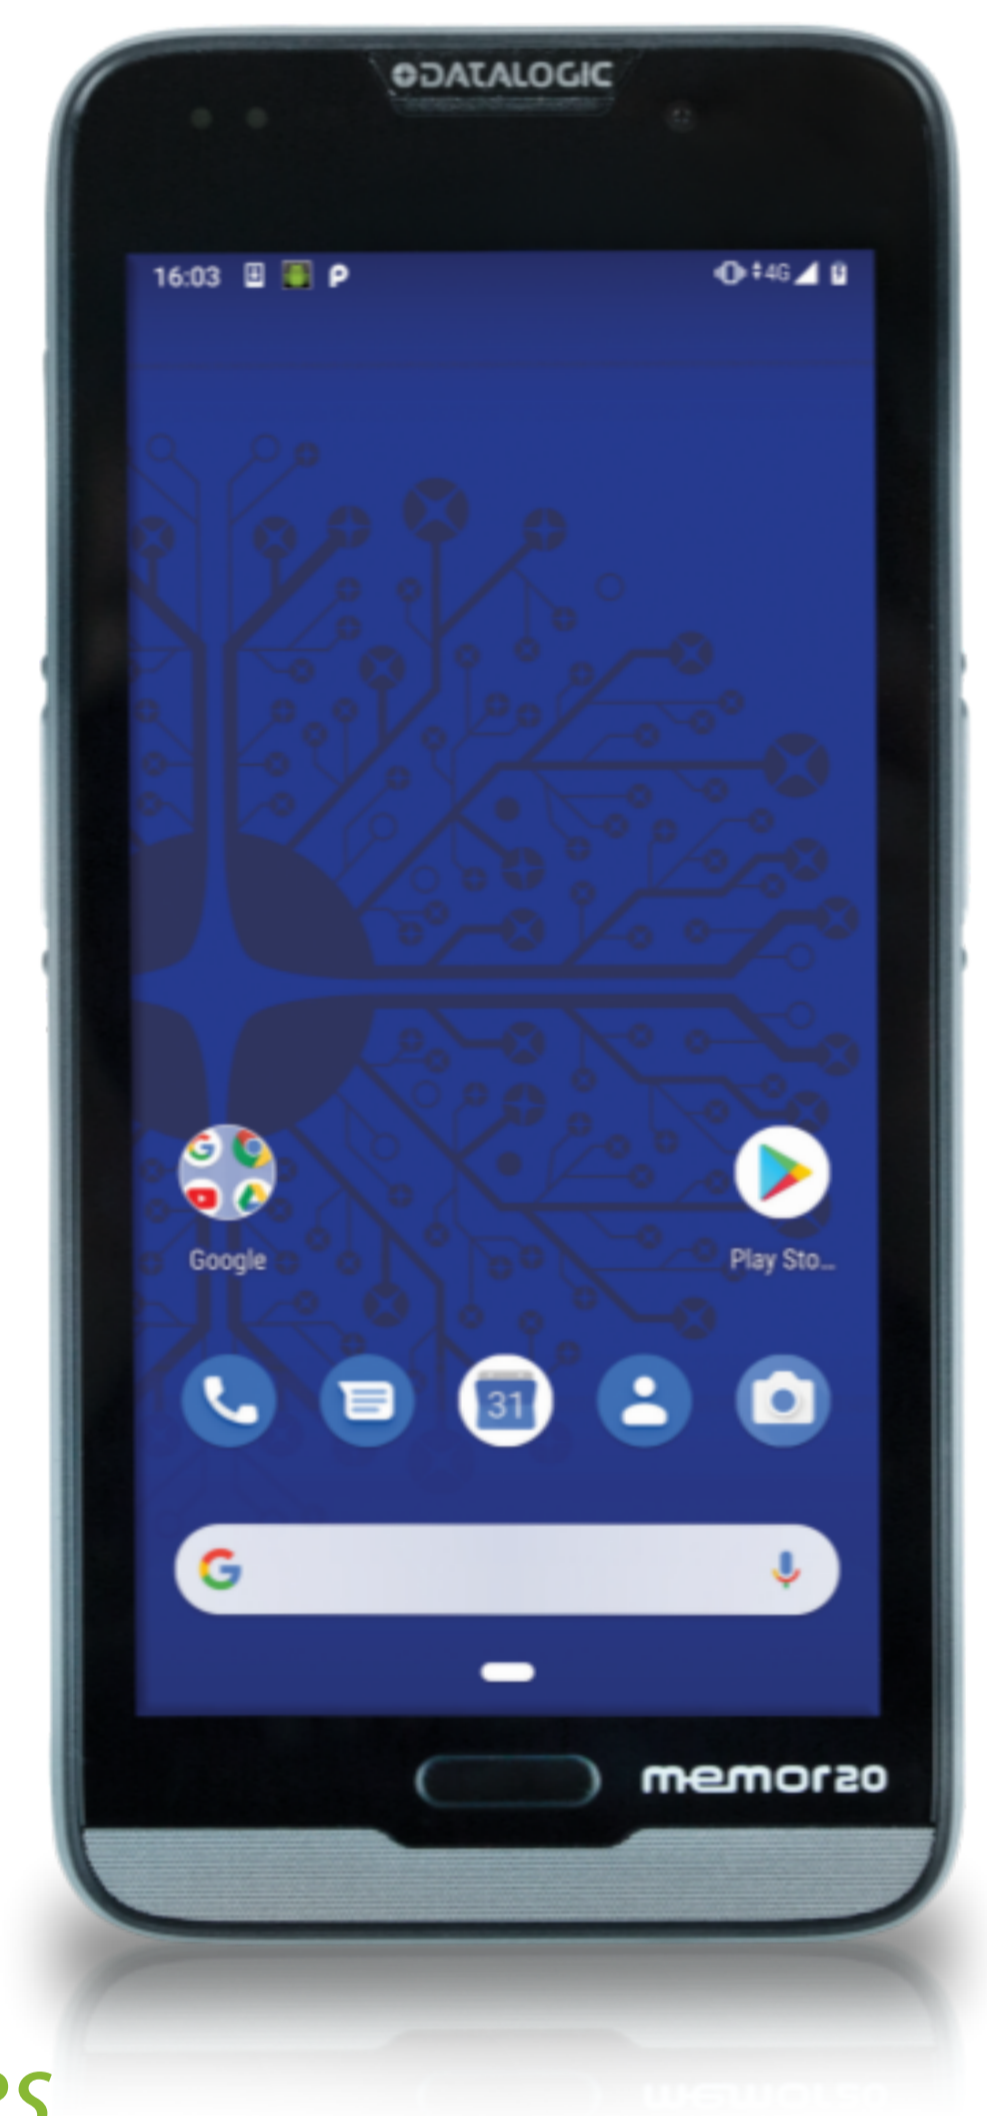

### Supported Platforms

- Android device 4.4 onward

## Key Features

*SureLock for Android provides a comprehensive lockdown solution for tablets and mobile devices with an array of useful features:*

- **Approved Application Use**  
Prevent unauthorized access to unapproved applications on Android devices.
- **Single Application Mode**  
Limit devices to a single application and transform them into purpose-specific kiosks.
- **Disable Peripheral Settings**  
Disable peripheral features, including camera, GPS, mobile data, Wi-Fi, Bluetooth, USB, and Airplane Mode.
- **Customization and Branding**  
Brand your locked device with corporate wallpapers and use customized icons and text.
- **Comprehensive Application Settings**  
Launch a chosen application on startup, clear data, and disable selective child windows.
- **SureLock Analytics**  
Get insights about application use and view when and how long they were used for.

- **Advanced Lockdown**

Disable Safe Mode, factory reset, USB debugging, bottom bar, notification panel, and status bar (for applicable devices).

- **Driver Safety**

Set a speed threshold to disable mobile device functionality when vehicles cross a certain speed.

- **Power-Saving Settings**

Use built-in features to reduce battery consumption and save power.

- **Call and Message Settings**

Completely disable, blacklist or whitelist phone numbers for calls and messages.

- **Import and Export Settings**

Mass-configure SureLock settings on all of your devices quickly and easily.

- **Compatibility with SureMDM - 42Gears' Mobile Device Management Solution**

Use SureMDM's built-in compatibility to remotely install, configure and manage SureLock.

## SureLock License Comparison
