Overview

This section is aim to provide a complete list of all the drivers of the components embedded in the Windows 10 IoT LTSC fw version released by Datalogic for Rhino II device.

Except from specific tools like DL Softkeys, all those drivers are recommended to be downloaded and adopted **ONLY** to build Win 10 IoT custom image for Rhino II devices when purchased with no OS pre-installed.

Component files name is structured as follow:
Component description+Version+OS+Board (if not specified it means the component is a common one)

For Example:
- *Intel Dynamic Tuning Processor Participant v8.6.10401.9906 Win10 IoT TC97*
  means
  Intel Dynamic Tuning Processor component version 8.6.10401.9906 suitable for Win 10 IoT OS running on TC97 board (Intel i5core)
- *Intel Dynamic Tuning Processor Participant v8.6.10402.11528 Win10 IoT QA3*
  means
  Intel Dynamic Tuning Processor component version v8.6.10402.11528 suitable for Win 10 IoT OS running on QA3 board (Intel Atom)
- *Realtek High Definition Audio Driver v2.82 Win10 IoT*
  means
  Realtek audio driver version 2.82 suitable for Win 10 IoT OS running on both TC97 and QA3 boards

See below for explanatory table, and refer to step-by-step build image guides available for the following models:
- *QA3 board (Intel Atom, capacitive touch)*
- *TC97 board (Intel i5core, capacitive touch)*

Datalogic reserve the right to update the components list only at its own discretion.

Explanatory Table

Description	Type	Version	Board
Intel Dynamic Tuning Processor Participant	Dynamic power management	8.6.10401.9906	TC97
